Exclusive Provider to the VA Hospital System

Introducing: the Cajun Commando ™ 4x4

When you think of Louisiana, from Bourbon Street to the Bayou, you immediately think of people with a zest for getting the most out of life.

Cajun – where excitement comes knocking on your front door.

Cajun wheelchairs has captured that spirit in the new Cajun Commando 4x4™ This U.S. made system is a versatile front wheel drive chair capable of turning 360 degrees from a stationary position, which gives it an industry best turning radius and extraordinary maneuverability.

If you're an outdoor enthusiast, the Commando 4X4 was designed with you in mind. Equally at home on wooded trails, tall grass, snow, mud or a sandy beach, this all wheel drive chair uses the latest in-line direct drive technology to produce the most powerful wheelchair in it's class.

The combination of high floatation 14" knobby tires and rear shock absorbers soften the ride and enhance the user's experience. With its high speed, high torque, high efficiency in-line gear motors and range of 24 miles per charge, the Commando 4x4 simply outperforms every other chair in its class.

Cajun didn't forget about safety either. In addition to the built in dynamic breaking they have also included an electronic automatic parking brake.

Add to that, the Falcon™ ACT Ultra Low tilt; the incomparable line of Falcon™ Gel for comfort and protection; Falcon™ hardware for proper positioning and maximum usability and you have the perfect general, all-purpose wheelchair solution for your rehab client
