## Forward...into the past!

Raised toilet seats have become sleeker to look at and less functional to use.

We couldn't really see much benefit to that.

With our new raised toilet seat, we have defied conventional thinking that products always have to look newer and high tech. We wanted ours to be stable and secure for the patient; easy to get on and off; with easy-to-reach, multiple access points for patient care (including suppository insertion, digital stimulation and perinea cleaning). We also wanted you to be able to order it with or without arms, as needed. And last, but not least we can also provide the best, bar non, gel toilet seat sleeve for those clients whose on-seat times can increase their risk of skin break down due to prolonged pressure.

**[See a product demonstration at <http://falconrehab.net/RaisedToiletSeat> ]**
